I am a software engineer with a passion for solving actual user problems, experienced team builder and a great eye for talent. Currently focused on: Software Engineering, Leadership, Product Development.

Data-driven, iterative in approach, empathetic to customer needs and relentless in delivering innovative and high-valuable customer-focused products.

Emotional Intelligent Leader: proven success in leading teams with effective hiring and developing high-performance distributed engineering teams.

Demonstrated empathy for customers, and the ability to translate ambiguous insights and observations into test ideas and product improvements.

Experienced in coordinating across teams of engineers and non-technical stakeholders. Exceptionally good at identifying, communicating, and resolving problems compassionately, professionally, and collaboratively.

Excellent organizational, prioritization and communication skills, with a high level of attention to detail.
